

Record video

When you selected all cameras, you see a preview in the main MediaRecorder window.

TIP If you selected multiple microphones, it can be useful to mute all but one audio channel in the preview. Select the audio source in the **Mute** column of the table under the preview. Muting audio in the preview does not influence the recording.

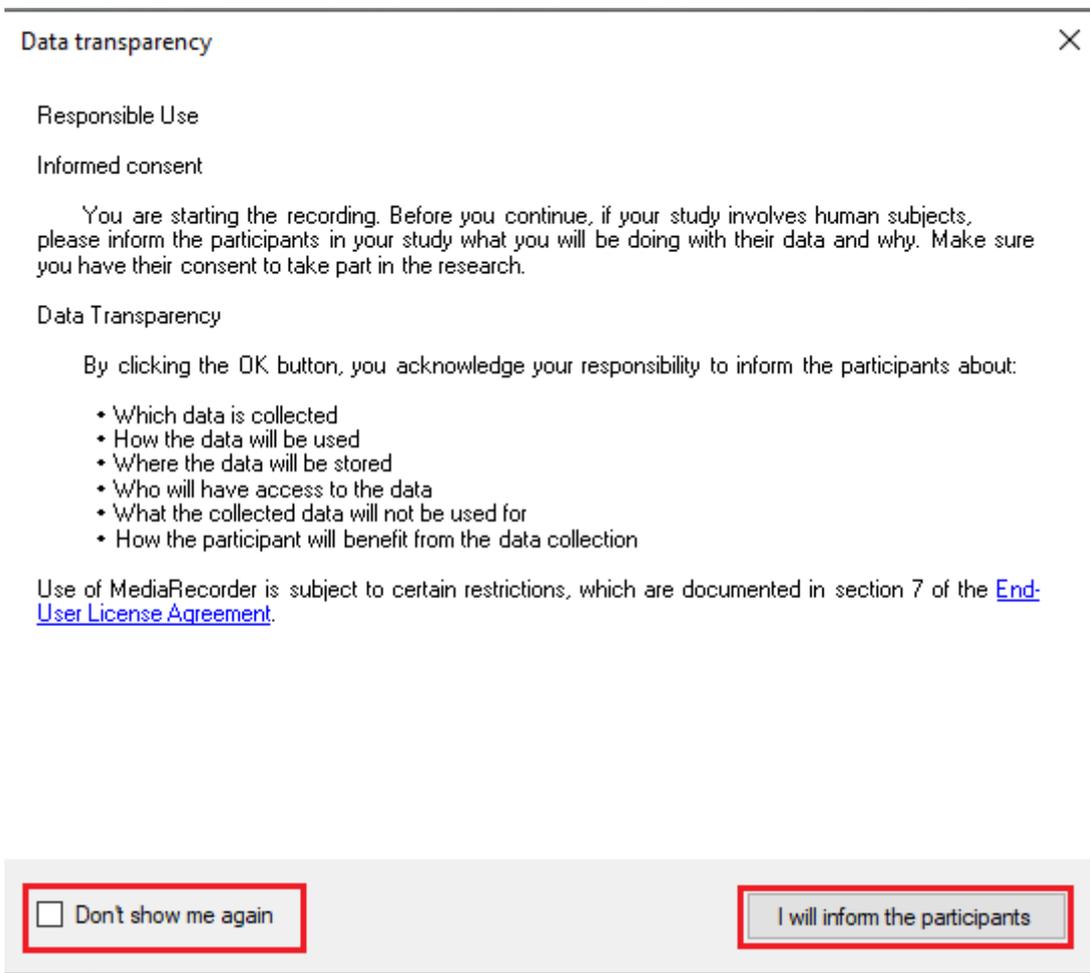

Nr	Use	Video name	Audio name	Mute	Volume
1	<input checked="" type="checkbox"/>	Video 1	Audio 1	<input type="checkbox"/>	
2	<input checked="" type="checkbox"/>	Video 2	Audio 2	<input checked="" type="checkbox"/>	
3	<input checked="" type="checkbox"/>	Video 3	Audio 3	<input checked="" type="checkbox"/>	
4	<input type="checkbox"/>	Video 4	Audio 4	<input type="checkbox"/>	

Identify Video Settings Refresh

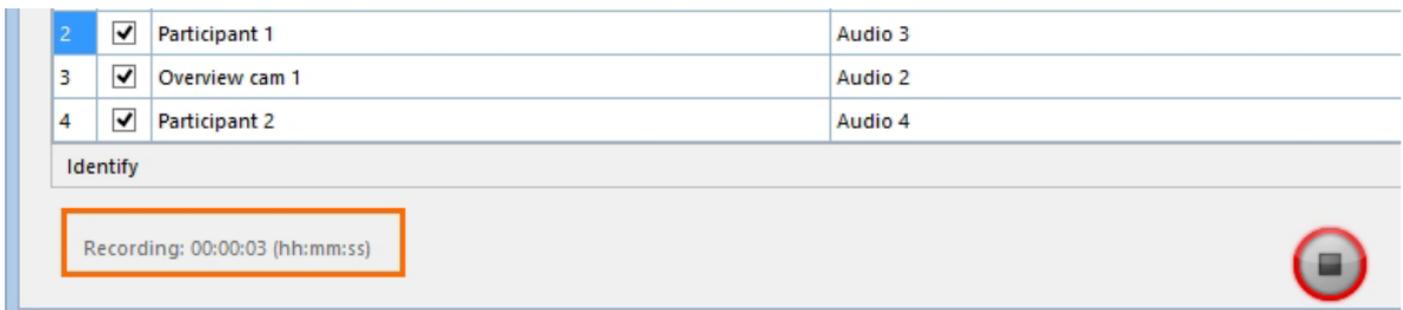

To start recording, press the **Start recording** button.

The screenshot shows a video recording control panel. At the top, there is a table with two columns: 'Mute' and 'Volume'. The 'Mute' column has a blue background with a white checkmark icon. The 'Volume' column has a green vertical bar. Below the table, there are two buttons: 'Video Settings' and 'Refresh'. At the bottom of the panel, there is a large circular button with a red dot in the center, which is highlighted with an orange square border. This button is the 'Start recording' button mentioned in the text.

A pop-up window will appear, informing you about Noldus's Data Transparency Policy. Read it carefully before clicking the **I will inform the participants** button. You can also check the box **Don't show me again** to prevent further occurrence.

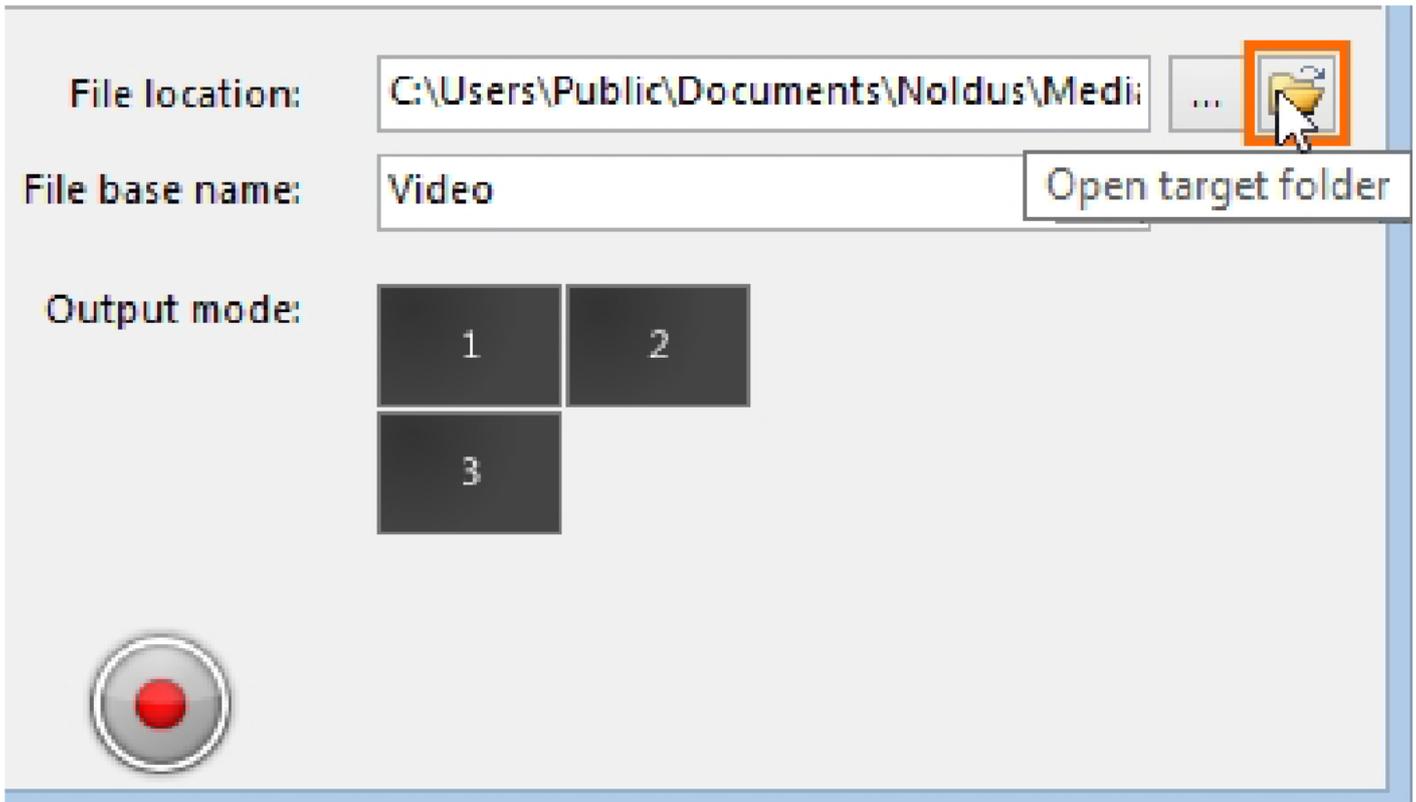

The button then changes into the **Stop Recording** button and the Recording timer starts running.

Press the button again to stop recording. Recording stops automatically when you [specified a recording time](#) .

how to access the recorded videos

To quickly access the recorded videos, press the **Open target folder** button in the main MediaRecorder window.

The video files are stored in the default video file location, or the location you specified. See [To select the video file location.](#)
